COMPANY PROFILE

Ga-Rankuwa - Zone 16 - 30 000m²

Nice to meet you | Bly te kenne

ABOUT US

Since it's inception in 1997, TARCO has remained focused on professional service and quality without compromise.

We service markets big and small and can accommodate our clients needs from pothole repairs to roads or parking decks.

We specialize in Asphalt and Paving and treat any project with equal dedication.

Ask any of our satisfied clients, we love the smell of hot-mix in the morning.

LIFE Healthcare - Bulk earthworks & Paving 4500m²

No try, Just do.

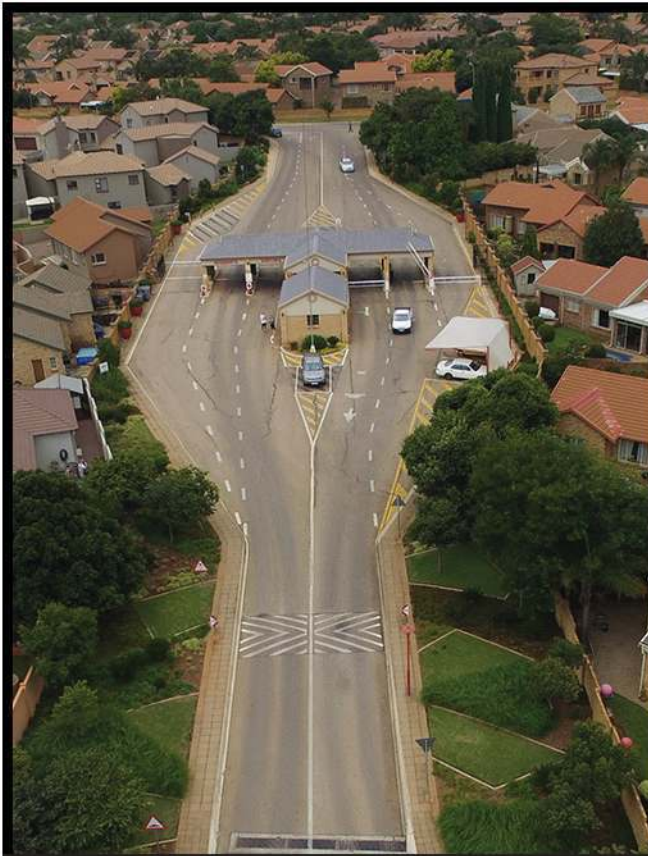

REJUVENATOR

Your road surface is probably the most expensive item on the premises but for some reason is given little or no attention. Only after surface failure will action be taken to start the costly and unsightly repair process that never seems to end.

We are changing the way our clients approach road maintenance by introducing Tarco Rejuvenator as a cost-effective, proven solution that resets the life of your road surface.

Our product is Agrèment Board (CSIR) Tested & Certified

Prevention is cheaper than cure

REJUVENATOR

Rejuvenate before it's too late.

If we didn't get to you in time, don't stress... Our Thermal Bond repair technique means that we hardly ever cut into the road surface like traditional contractors do. Using infrared heaters, we re-heat the existing asphalt, blend and scarify to the correct levels, and re-compact the surface to a uniform, thermally bonded layer.

The Thermal Bond repair is an Agrèment (CSIR) Certified technique.

The same thermal technique is applied to cracks and existing saw cut joints.

The process takes longer but is environmentally friendly and a superior technique compared to traditional methods.

We pay close attention to sealing your road and keeping it sealed. That is why, where possible, we also seal the joint where the road meets the Kerb-line.

This is the perfect place for water from daily irrigation, pool flushing and natural precipitation to enter and attack the substrate.

MnDOT did a study and published the Edge-Joint Sealing as a Preventive Maintenance Practice report which showed that by sealing the joint between the concrete main-line pavement and the asphalt shoulders there was a greater than 80% reduction in water infiltration.

Prevention is cheaper than cure

THE REJUVENATOR

Use

This certificate covers the use of THE Rejuvenator as a revitaliser for existing bitumen based surfaces thereby sealing the micro cracks and extending the life span of the surface in all regions of South Africa.

This certificate and Agrément South Africa's assessment apply only to THE Rejuvenator as described in this certificate, and where the terms and conditions of certification are complied with.

Technical work

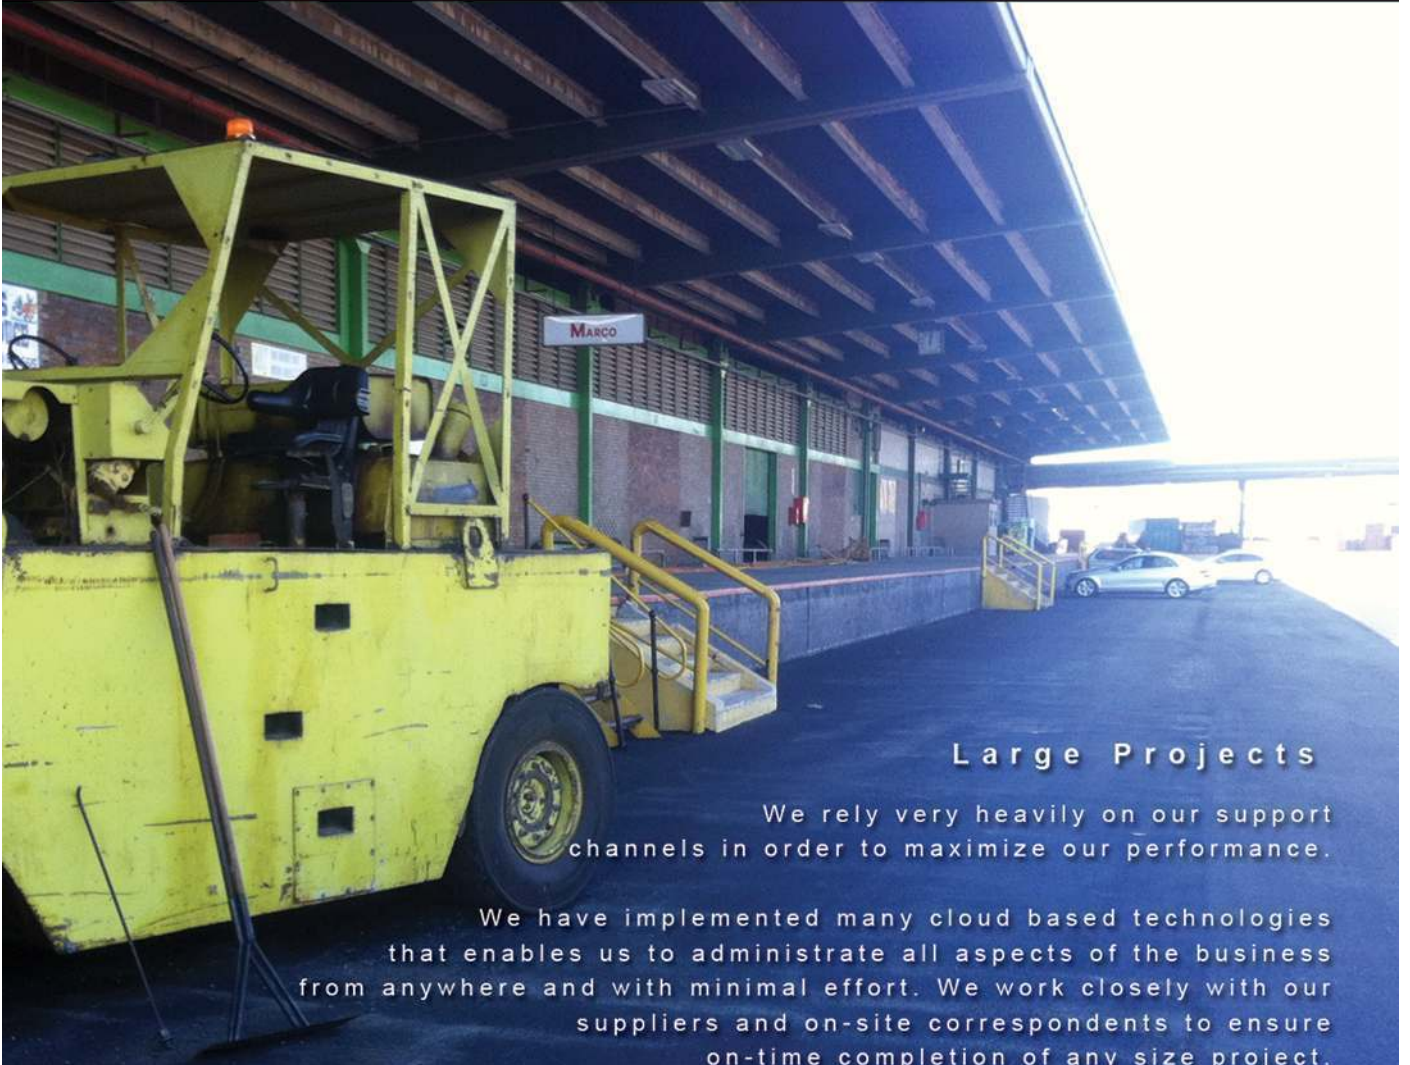

Our hand work has been approved by many authorities and engineers. A smoother hand laid asphalt surface does not exist.

Rooftop work

We are trusted by the leading Waterproofing contractors to install a wearing course onto their delicate waterproofing.

Large Projects

We rely very heavily on our support channels in order to maximize our performance.

We have implemented many cloud based technologies that enables us to administrate all aspects of the business from anywhere and with minimal effort. We work closely with our suppliers and on-site correspondents to ensure on-time completion of any size project.

"The greater the obstacle, the more glory in overcoming it."
-Molière-

JHB Fresh produce market - Internal roads - 30 000m²

"We love the smell of Hot-mix in the mornig"

Patch and Repair

We have a dedicated repair and maintenance team that perform important duties for running account clients. We fill cracks, fix potholes, build speed-humps, repair trenches and maintain the overall state of asphalt, paving and concrete surfaces.

Some clients.

We've been doing this for a while, it would be impossible to fit all the logo's in this book.

These are some of our long standing clients or at least, those we could find nice logos for.
